Our Network

We are working PAN India, we have resident representative in four zones.

A) Maharashtra: Mumbai and Goa

B) Ahmedabad, Baroda, Indore

C) Hyderabad, Chennai

D) Bangalore, Mysore

Product Portfolio

Pharmaceutical Impurity Standards:

Impurities' refers to synthetic impurity standards and known metabolites of APIs that have been resynthesized to highest purity and are supplied with detailed analysis along with precise identification and qualification of extraneous molecule that may be present in APIs, can alter the

properties of Drug significantly and its important for registration process where exact identification and qualification of impurities is essential for documentation. We have inventory of few hundred reference standards from 300 APIs.

We engage with the customers to enable them with various Impurities that can need at various stages of drug development and research.

Pharmacopeia Reference Standards:

We Ion Science serve our clients with the European Pharmacopeia (EP), British Pharmacopeia (BP), Japanese Pharmacopeia (JP).

EDQM, a organization monitors and develops the application of quality standards

for safe medicine and their safe use. These standards are recognized as a scientific benchmark world-wide.

British Pharmacopeia chemical reference substances (BPCRS) are primary standard which established using absolute

methods and the declared content figures are determined without comparing to another substance.

Metabolites:

We are connected and associated with large group of manufacturers who are specialized in manufacturing of Metabolites

A metabolite is a intermediate end product of metabolism. The term metabolite is usually restricted to small molecules. A drug metabolite is a byproduct of break down or "metabolizing", a drug into a different substance

Working Standard:

Ion Science is confirm supplier of a Working standard. We have firm source for the Working standards. A drug substance of established quality and purity as shown by comparison to the reference standards.

Working standard is used for routine analysis.

The working standard is qualified

against the pharmacopeial reference standard or certified reference standard.

Qualification of working standard is done by using a verified or validated analytical method and its results are compared with the reference standard.

Isotope Labeled Molecules

Ion Science oriented itself with the India's and world's top manufacturers for procuring the isotope Labeled Molecules to cater the requirement of Pharmaceutical companies, keeping a moto to spent less time and resources.

API Products:

The have established a wide network with leading API manufacturers so that the serving Pharmaceutical industry becomes hassle free.

We deals foreign manufacturer also to meet the demand of Indian Pharmaceutical Industry.

Our Inventory composed of more than 300 APIs.

This makes us more leasable as API Supplier.

Speciality Chemicals:

We Ion Science is the One Stop Solution for Specialty Chemicals . Our reach for the specialty chemicals is much wider and deeper that can enable us cater the needs of Indian Pharma industry much better than the others.

We have associated with the india's leading manufacturers so that we can deliver maximum in minimum time.

Agrochemical Working Standards:

Ions Science closely working Agrochemical companies and meet their needs with serving precise and timely required ingredients. We are important part of Agrochemical Industry as their ingredient supplier.

Our Reach

We are bound our-self with Pharmaceutical Industry on a Pan India Scale which enable us to Serve better, wide and precise.
